DEVIXO SOLUTIONS

WEB DEVELOPMENT INTERNSHIP PROGRAM

TASK 02

INTERACTIVE BUSINESS WEBSITE "LUMEN STUDIO"

Submitted By: Shahsawar Khan

Internship Domain: Web Development

Technologies Used: HTML5 | CSS3 | JavaScript (Vanilla)

Submission Date: October 13, 2026

Design. Develop. Showcase.

PAGE 3 — OBJECTIVE

1. OBJECTIVE

The objective of Task 02 was to build a fully responsive multi-page business website using HTML5, CSS3 and Vanilla JavaScript — without using any CSS frameworks or JavaScript libraries.

The goal was to:

- Design and develop 5 interconnected pages (Home, About, Services, Portfolio, Contact)
- Implement at least 6 interactive JavaScript features
- Build a modern, professional UI/UX system
- Ensure the website works perfectly on desktop, tablet and mobile devices
- Apply a consistent color scheme and typography
- Organize the folder structure professionally
- Deploy the website using GitHub Pages

This task demonstrates practical application of core web development skills including semantic HTML5, modern CSS3 techniques, DOM manipulation, and event-driven interactivity.

PAGE 4 — TECHNOLOGIES USED

2. TECHNOLOGIES USED

Technology	Purpose
HTML5	Semantic page structure
CSS3	Styling, Flexbox, Grid
JavaScript (ES6+)	Interactivity and DOM
Google Fonts	Sora + DM Sans
CSS Custom Properties	Light & dark theme system
IntersectionObserver API	Scroll reveal + counters
localStorage API	Theme persistence

FRAMEWORKS NOT USED:

✗ No Bootstrap

✗ No Tailwind CSS

✗ No jQuery

✗ No React / Vue / Angular

✗ No downloaded templates

All code was written from scratch.

PAGE 5 — WEBSITE STRUCTURE

3. WEBSITE STRUCTURE

5 INTERCONNECTED PAGES:

1. HOME (index.html)
   - Hero with typing animation
   - Animated counters strip
   - Services preview (6 cards)
   - Featured work (bento layout)
   - Testimonial slider
   - CTA banner

2. ABOUT (about.html)
   - Page hero
   - Our Story section
   - Core Values (4 cards)
   - Team members (3 cards)
   - Milestone timeline (2018 → 2026)

3. SERVICES (services.html)
   - Page hero
   - 6 detailed service cards
   - 4-step process section

4. PORTFOLIO (portfolio.html)

- Page hero
- Category filter (All, Web, Branding, App, UI/UX)
- 9 project cards
- Animated counters

5. CONTACT (contact.html)

- Contact information panel
- Validated contact form (7 fields)
- Map placeholder
- Social links

FOLDER STRUCTURE:

```
lumen-studio/
├── index.html
├── about.html
├── services.html
├── portfolio.html
├── contact.html
├── css/
│   └── style.css
├── js/
│   └── main.js
└── images/
    └── (11 images)
```

PAGE 6 — DESIGN APPROACH

4. DESIGN APPROACH

COLOR PALETTE:

- Primary: #4f46e5 (Deep Indigo)
- Primary Dark: #4338ca
- Accent: #f59e0b (Warm Amber)
- Gradient: linear-gradient(135deg, #4f46e5, #7c3aed, #f59e0b)
- Background: #ffffff / #0b0b14 (dark mode)
- Text: #0f0f1a / #f1f1f5 (dark mode)

TYPOGRAPHY:

- Headings: Sora (weights 400–800)
- Body: DM Sans (weights 400–700)
- Line height: 1.65 for readability

LAYOUT SYSTEM:

- CSS Grid for section layouts
- Flexbox for navbar, buttons, cards
- Container max-width: 1200px
- Consistent vertical section padding

DESIGN ELEMENTS:

- Glassmorphism navigation bar (blur effect)
- Animated background blobs (hero section)
- Gradient text and buttons
- Card hover lift effects
- Rounded corners (14px default)
- Soft drop shadows

ACCESSIBILITY:

- Semantic HTML5 elements
- Focus-visible outlines for keyboard users
- ARIA labels on interactive elements
- Sufficient color contrast ratio

PAGE 7 — JAVASCRIPT FEATURES (Part 1)

5. INTERACTIVE JAVASCRIPT FEATURES

The task required at least 6 interactive features.
10 features were implemented:

1. DARK / LIGHT MODE TOGGLE

- Toggle button in navbar
- Persists preference via localStorage
- Instant theme switch using CSS variables
- Smooth transitions on all elements

2. RESPONSIVE MOBILE NAVIGATION

- Full-screen overlay menu on mobile
- Animated hamburger-to-X transition
- Auto-closes when a link is clicked
- ESC key closes the menu

3. TYPING ANIMATION

- Hero headline types 4 rotating phrases
- Loop with delete-and-retype effect
- Natural typing rhythm with pauses
- Blinking cursor effect

4. ANIMATED COUNTERS

- Numbers count up from 0 to target
- Triggered by IntersectionObserver
- Runs once per page load
- Smooth interpolation

PAGE 8 — JAVASCRIPT FEATURES (Part 2)

5. TESTIMONIAL SLIDER

- Auto-plays every 6 seconds
- Previous/Next navigation buttons
- Clickable dot indicators
- Keyboard arrow key support
- Pauses on hover

6. FAQ ACCORDION

- Click a question to expand/collapse
- One open at a time
- Smooth height transition
- First item opens by default

7. PORTFOLIO FILTER

- 5 categories (All, Web, Branding, App, UI/UX)
- Instant filtering without page reload
- Empty state message when no match

8. FORM VALIDATION

- Real-time field validation
- On-blur and on-submit checks
- Visual error/success states
- Success message on valid submit

PAGE 9 — JAVASCRIPT FEATURES (Part 3)

9. SCROLL-TO-TOP BUTTON

- Appears after 400px scroll
- Smooth scroll to top
- Hover lift effect

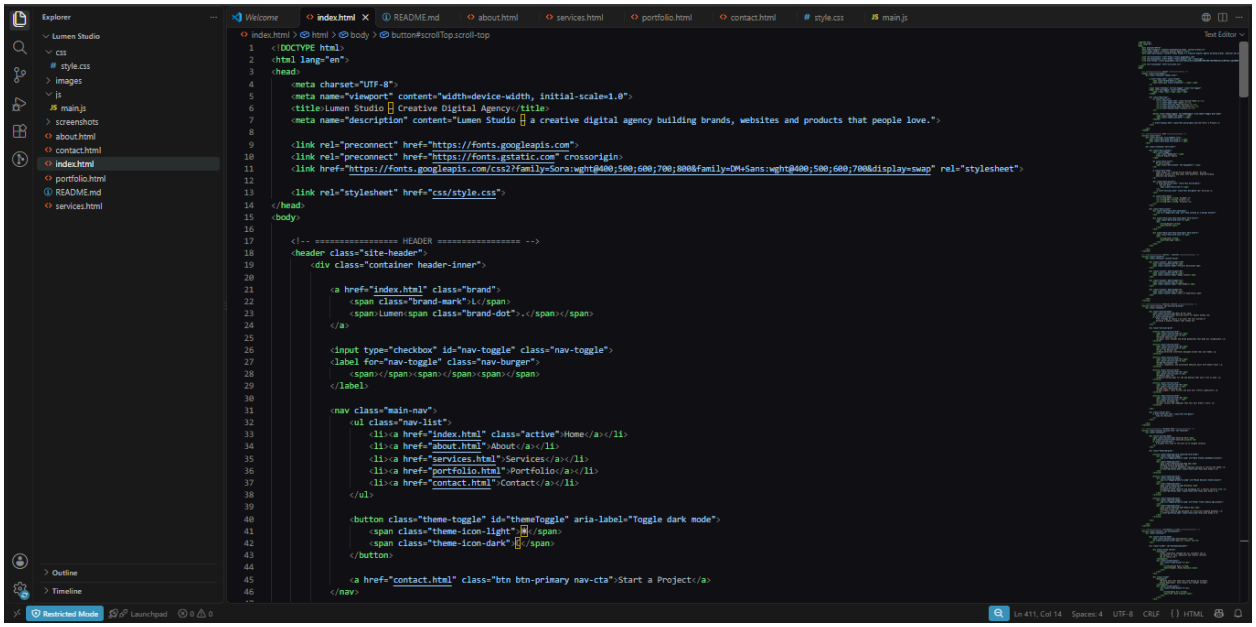

10. SCROLL REVEAL ANIMATION

- Sections fade in and slide up on scroll
- IntersectionObserver-based
- Runs once per element
- Adds .visible class dynamically

PAGE 10-13 — CODE SCREENSHOTS

6. CODE SCREENSHOTS

6.1 HTML Structure — Navbar

```
<!DOCTYPE html>
<html lang="en">
<head>
    <meta charset="UTF-8">
    <meta name="viewport" content="width=device-width, initial-scale=1.0">
    <title>Lumen Studio — Creative Digital Agency</title>
    <meta name="description" content="Lumen Studio — a creative digital agency building brands, websites and products that people love.">

    <link rel="preconnect" href="https://fonts.googleapis.com">

    <link href="https://fonts.googleapis.com/css2?family=Sora:wght@400;500;600;700;800&family=DM+Sans:wght@400;500;600;700&display=swap" rel="stylesheet">

    <link rel="stylesheet" href="css/style.css">
</head>
<body>

    <!-- ================ HEADER ================ -->
    <header class="site-header">
        <div class="container header-inner">

            <a href="index.html" class="brand">
                <span class="brand-mark">L</span>
                <span>Lumen<span class="brand-dot">.</span></span>
            </a>

            <input type="checkbox" id="nav-toggle" class="nav-toggle">
            <label for="nav-toggle" class="nav-burger">
                <span></span><span></span><span></span>
            </label>

            <nav class="main-nav">
                <ul class="nav-list">
                    <li><a href="index.html" class="active">Home</a></li>
                    <li><a href="about.html">About</a></li>
                    <li><a href="services.html">Services</a></li>
                    <li><a href="portfolio.html">Portfolio</a></li>
                    <li><a href="contact.html">Contact</a></li>
                </ul>

                <button class="theme-toggle" id="themeToggle" aria-label="Toggle dark mode">
                    <span class="theme-icon-light">☀</span>
                    <span class="theme-icon-dark">☾</span>
                </button>

                <a href="contact.html" class="btn btn-primary nav-cta">Start a Project</a>
            </nav>
```

6.2 HTML — Hero Section

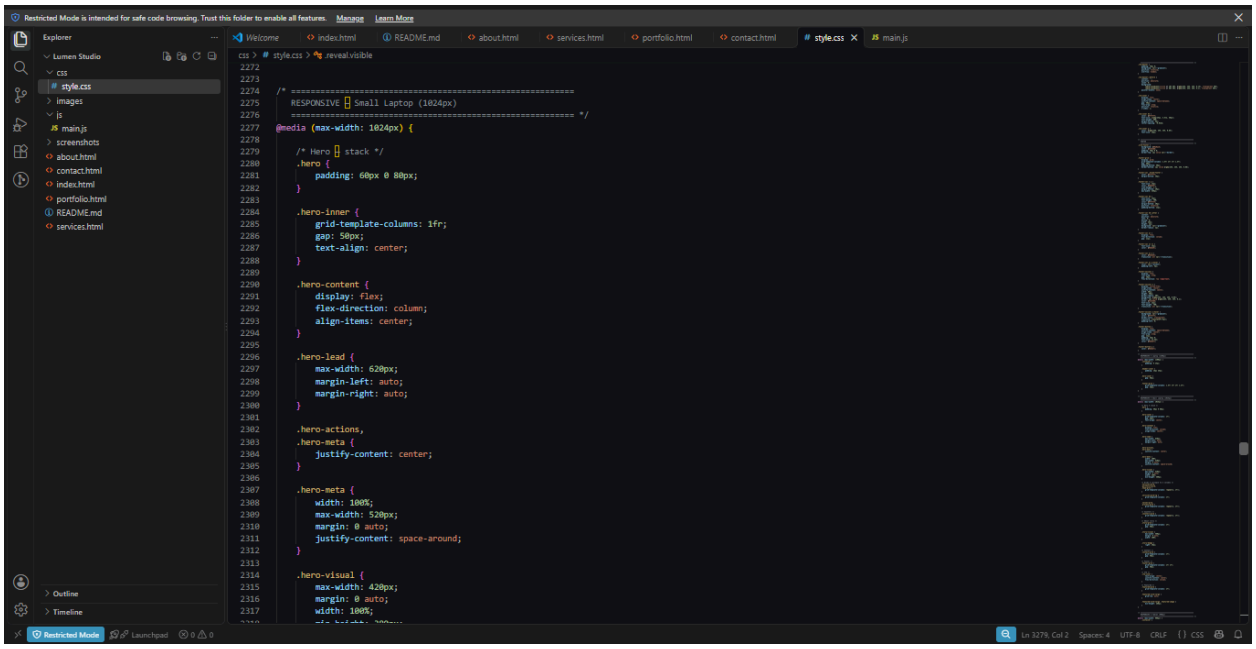

Caption: Hero section with typing animation placeholder and CTA buttons.

6.3 CSS Variables — Theme System

Caption: CSS custom properties defining light and dark theme colors.

6.4 CSS — Responsive Media Queries

```
/* ==========
   RESPONSIVE — Small Laptop (1024px)
   ========== */
@media (max-width: 1024px) {

    /* Hero — stack */
    .hero {
        padding: 60px 0 80px;
    }

    .hero-inner {
        grid-template-columns: 1fr;
        gap: 50px;
        text-align: center;
    }

    .hero-content {
        display: flex;
        flex-direction: column;
        align-items: center;
    }

    .hero-lead {
        max-width: 620px;
        margin-left: auto;
        margin-right: auto;
    }

    .hero-actions,
    .hero-meta {
        justify-content: center;
    }

    .hero-meta {
        width: 100%;
        max-width: 520px;
        margin: 0 auto;
        justify-content: space-around;
    }

    .hero-visual {
        max-width: 420px;
        margin: 0 auto;
        width: 100%;
```

Caption: Media queries for mobile breakpoints,
activating the hamburger menu at 768px.

6.5 JavaScript — Theme Toggle

```
/* ==========
   LUMEN STUDIO — Main JavaScript
   10 Interactive Features
   ========== */

'use strict';

/* ==========
   1. THEME TOGGLE (Dark / Light Mode)
   ========== */
(function initTheme() {
    const themeToggle = document.getElementById('themeToggle');
    if (!themeToggle) return;

    // Page load pe saved theme apply karein
    const savedTheme = localStorage.getItem('lumen-theme');
    if (savedTheme === 'dark') {
        document.body.classList.add('dark-mode');
    }

    // Toggle click handler
    themeToggle.addEventListener('click', () => {
        document.body.classList.toggle('dark-mode');

        const currentTheme = document.body.classList.contains('dark-mode')
            ? 'dark'
            : 'light';

        localStorage.setItem('lumen-theme', currentTheme);
    });
})();

/* ==========
   2. MOBILE NAVIGATION — Close on link click
   ========== */
(function initMobileNav() {
    const navToggle = document.getElementById('nav-toggle');
```

Caption: Theme toggle logic with localStorage persistence.

6.6 JavaScript — Typing Animation

```
/* ============================================================
   3. TYPING ANIMATION (Hero section)
   ============================================================ */
(function initTyping() {
    const typingEl = document.getElementById('typingText');
    if (!typingEl) return;

    const words = [
        'that stand out.',
        'people remember.',
        'that convert.',
        'worth talking about.'
    ];

    let wordIndex = 0;
    let charIndex = 0;
    let isDeleting = false;

    function type() {
        const currentWord = words[wordIndex];

        if (isDeleting) {
            typingEl.textContent = currentWord.substring(0, charIndex - 1);
            charIndex--;
        } else {
            typingEl.textContent = currentWord.substring(0, charIndex + 1);
            charIndex++;
        }

        let typeSpeed = isDeleting ? 40 : 90;

        // Word complete — pause then delete
        if (!isDeleting && charIndex === currentWord.length) {
            typeSpeed = 1800;
            isDeleting = true;
        }
```

Caption: Typing animation cycling through 4 different phrases.

6.7 JavaScript — Form Validation

```
/* ============================================================
   8. CONTACT FORM VALIDATION
   ============================================================ */
(function initFormValidation() {
    const form = document.getElementById('contactForm');
    if (!form) return;

    const successMsg = document.getElementById('formSuccess');

    // Validation rules
    const rules = {
        name: {
            required: true,
            minLength: 3,
            message: 'Please enter your full name (min 3 characters).'
        },
        email: {
            required: true,
            pattern: /^[^\s@]+@[^\s@]+\.[^\s@]+$/,
            message: 'Please enter a valid email address.'
        },
        phone: {
            required: false,
            pattern: /^[\d\s\+\-\(\)]{7,20}$/,
            message: 'Please enter a valid phone number.'
        },
        subject: {
            required: true,
            minLength: 3,
            message: 'Please enter a subject.'
        },
        message: {
            required: true,
            minLength: 10,
            message: 'Please write at least 10 characters.'
        }
    };

    function showError(fieldName, message) {
        const field = form.querySelector(`#${fieldName}`);
        if (!field) return;

        const wrapper = field.closest('.form-field');
        const errorEl = form.querySelector(`[data-error-for="${fieldName}"]`);

        if (wrapper) {
            wrapper.classList.add('error');
            wrapper.classList.remove('success');
        }
        if (errorEl) errorEl.textContent = message;
    }

    function clearError(fieldName) {
        const field = form.querySelector(`#${fieldName}`);
        if (!field) return;
```

Caption: Validation rules object for form fields with regex patterns.

6.8 JavaScript — IntersectionObserver

```
    }

    // IntersectionObserver ek visible hone pe trigger
    const observer = new IntersectionObserver((entries) => {
        entries.forEach(entry => {
            if (entry.isIntersecting) {
                animateCounters();
                observer.disconnect();
            }
        });
    }, { threshold: 0.3 });

    const firstCounter = document.querySelector('.counters');
    if (firstCounter) observer.observe(firstCounter);
})();

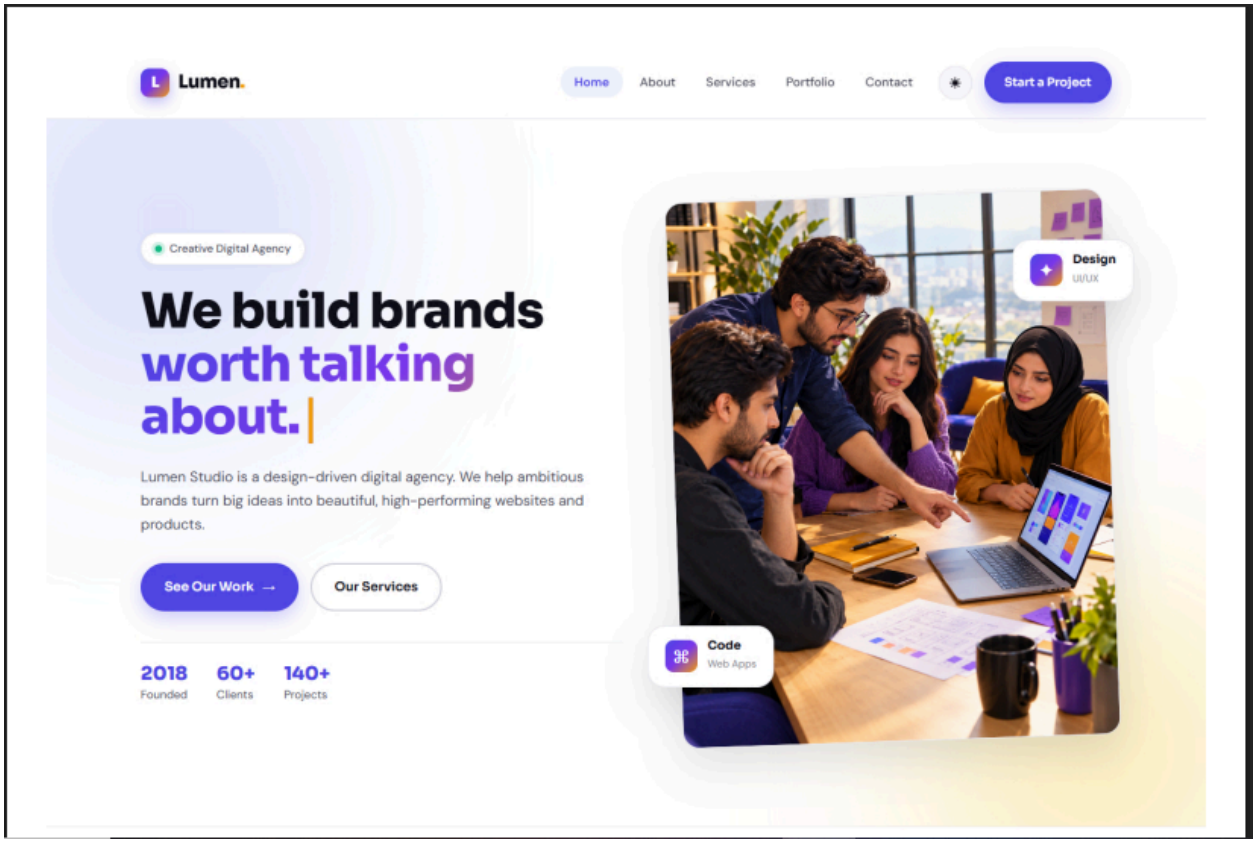

```

PAGE 24 — CONCLUSION

---

10. CONCLUSION

This task successfully demonstrated the ability to build a complete multi-page business website using only HTML5, CSS3 and Vanilla JavaScript.

Key achievements:

- Built 5 interconnected, fully responsive pages
- Implemented 10 interactive JavaScript features

(task requirement was only 6)
- Designed a consistent modern UI with light and dark themes
- Applied semantic HTML5 and modern CSS3 techniques (Flexbox, Grid, Custom Properties)
- Wrote clean, organized, maintainable code
- Deployed the website using GitHub Pages (bonus)

The final website works seamlessly across desktop, tablet and mobile devices. It meets and exceeds all requirements outlined in Task 02.

Key learnings:

- DOM manipulation with vanilla JavaScript
- IntersectionObserver for scroll-based effects
- localStorage for persistent user preferences
- Building design systems using CSS variables
- Structuring multi-page websites professionally
- Git & GitHub workflow for version control
